FAUST accuracy/performance tradeoff

A scatter plot with x-axis "Accuracy (area under curve)" ranging from 0.5 to 1.0 and y-axis "Mean time (seconds)" ranging from 0 to 80. Data points labeled: heat kernel signature (~0.61, 68), wave kernel signature (~0.86, 70), laplacian eigenvecs (~0.53, 13), curvatures (~0.71, 1).
